

Mould on Walls

Due to very humid conditions in Kwa-Zulu Natal, mould is a common problem. Harsh chemicals has been used before with no success.

Products to be used:

Bathroom deep cleaner & descaler

1L | 5L | 20L | 100ml sachet

Nu-bioscrub™ was used at a dilution of 1:10, 100ml of nu-bioscrub™ to 1L cold water. The nu-bio-scrub solution was sprayed on the surface and left for 5 - 10 minutes. Using a bristle brush to scrub the surface the debris was removed and rinsed away after scrubbing.

Conclusion:

- Nu-BioScrub™ effectively removes mould and mineral deposits, descales and deep cleans surfaces.
- Innu-science products are easy to use with no health risks - no VOC fumes. The lack of VOC's compensates for the additional contact time of at least 5 minutes needed to get the optimum results..
- Enhanced aesthetics as a clean and shiny environment provides the customer with the peace of mind that the premises are clean and the environment unaffected.

Choosing Innu-Science products means:

-  High performance
-  Environmental friendly
-  No surface damaging
-  Cost efficiency
-  Safety for the hand-users
-  Certification by recognized environmental authorities
