

Bathroom Basins

Soap scum, mineral deposits and other soils accumulated on these basins in this security bathroom due to the bathrooms not being cleaned as often as needed as well as inadequate cleaning and use of ineffective products and chemicals that did not remove these soils and stains.

Products to be used:

Bathroom deep cleaner & descaler

1L | 5L | 20L | 100ml sachet

Nu-bioscrub™ was used at a dilution of 1:10, 100ml of nu-bioscrub™ to 1L cold water.

The nu-bio-scrub solution was sprayed on the surface and left for 5 - 10 minutes. Using a white hand pad, debris was removed around the tap and water outlet, wiping the rest of the surface with a microfibre cloth. Rinsing not necessary unless to wash away debris after wiping.

Conclusion:

- Nu-BioScrub™ effectively removes soap scum and mineral deposits, descales and deep cleans bathroom surfaces.
- Innu-science products are easy to use with no health risks - no VOC fumes. The lack of VOC's compensates for the additional contact time of at least 5 minutes needed to get the optimum results..
- Enhanced aesthetics as a clean and shiny environment provides the customer with the peace of mind that the premises are clean and the environment unaffected.

Choosing Innu-Science products means:

-  High performance
-  Environmental friendly
-  No surface damaging
-  Cost efficiency
-  Safety for the hand-users
-  Certification by recognized environmental authorities
